

ORION™ LED Module

More light where you want it

The Orion™ LED product range uses the innovative Stellar™ beam forming technology to enable freedom of design, reduced footprint and improved thermal characteristics in directional lighting applications. Orion™ is a complete LED lighting module, including optics, all from a module thickness of just 5.6mm.

Benefits of Plessey's ORION™ LED Module

- Less than 6mm in depth
- 82mm diameter footprint
- Available in 15°, 25° and 60° FWHM
- Up to 10,000 CBCP
- Uniform colour over angle
- Range of standard colour temperatures

Plessey's ORION™ versus best in class COBs

Plessey:	vs.	Competitors:
3,250lm		5,500lm
7,200 CBCP		5,900 CBCP
0.97 \$/CBCP		1.12 \$/CBCP

CBCP – Central Beam Candela Power
