

DYNAMIC SHOP LIGHTING? CHILD'S PLAY WITH LUGA SHOP TUNEABLE WHITE

Established LUGA Shop modules in a Tuneable White version

Thanks to our new LUGA Shop Tuneable White modules, you'll always have the right LED module at hand. Excellent quality paired with the highest efficiency – and now also with a light temperature dynamic for seamless adjustment of the light temperature in a range of 2700 to 6500 K. Our "ring dispense phosphorous" technology ensures particularly homogeneous light distribution.

These new **LUGA Shop Tuneable White** modules are available in two design sizes with three light-emitting surfaces as well as with three lumen packages, which are especially suitable for reflector luminaires for shop use. They come with a service life of up to 60,000 hours (L90/B10) – and a product warranty of 5 years.

LUGA Shop Tuneable White

- 3 constant lumen packages: 1700 lm, 3000 lm, 4000 lm
- Very low colour tolerance: 4 MacAdam
- Very long service life: up to 60,000 hours

Holders for LUGA Shop Modules

Benefit from our holder system for simple and safe attachment and connection of LUGA PCBs. The holder consists of two parts. The first is a base plate that is attached to the luminaire or a heat sink using two screws. Then, after inserting the LUGA Shop PCB, the cover – the second part that also contains the push-in terminals – is simply snapped into place on top. The attachment screws are thus not visible. Push-in connectors are available for both the Tuneable White and Standard modules.
